

AASHISH KUMAR SAINI

AI Engineer || LLM • RAG • LangGraph • LangChain • FastAPI • Python
aashishkumarsaini2003@gmail.com | +918764954136 | Alwar, Rajasthan

Portfolio | LinkedIn | GitHub | HackerRank

AI Engineer specializing in AI agents, workflow automation, and Generative AI applications. Experienced in building scalable solutions using LangGraph, LangChain, FastAPI, RAG, and n8n. Developed 20+ AI-powered automation workflows integrating APIs, databases, and business tools to streamline operations and improve efficiency.

EDUCATION

Laxmi Devi Institute of Engineering and Technology

Bachelor of Technology (B. Tech) in Computer Science and Engineering

CGPA: 9.56 / 10

Alwar, Rajasthan

August 2022 - July 2026

WORK EXPERIENCE

Dream Wedding Hub | Machine Learning Intern (On-site)

Alwar, Rajasthan | January 2026 – April 2026

- Designed and implemented 20+ advanced automation workflows using n8n to streamline business processes and reduce manual effort.
- Integrated AI capabilities within n8n to build scalable, intelligent workflow solutions.
- Optimized operational efficiency by connecting multiple tools, APIs, and data sources through automated pipelines.
- Collaborated with teams to translate business requirements into reliable, production-ready automation systems.

Suvidha Foundation | Artificial Intelligence Intern

Maharashtra | April 2025 - May 2025

Fin Advisor: Personalized Financial Advice Generator (AI Intern Solo Project)

- Built an end-to-end NLP system to generate personalized investment advice from real-time financial news.
- Implemented data pipeline: news scraping (RSS + Feedparser), preprocessing (pandas), NER (spaCy), sector & ticker mapping (yfinance), sentiment analysis (FinBERT).
- Created embeddings and stored in ChromaDB for semantic search and user profile matching.
- Applied Retrieval-Augmented Generation (RAG) with LLMs to deliver tailored financial insights based on user profiles.

SKILLS

Programming Languages:

Python

Libraries/Frameworks:

LangGraph, LangChain, MCP, CrewAI, LangSmith, FastAPI, TensorFlow, HuggingFace Hub, Scikit-learn, Pandas, NumPy, Seaborn, Matplotlib, BeautifulSoup, Docker,

Tools / Platforms:

n8n, Make.com, Zapier, Airtable, MLflow, Deepgram, Excel, Git, Power BI, Jupyter Notebook, Google Colab, Streamlit, Microsoft Word

Databases:

SQL, MongoDB, ChromaDB, FAISS, Pinecone, Supabase

PROJECTS

ChatBot Pro | Link

Python, FastAPI, LangGraph, React, PostgreSQL, JWT

- Built a full-stack AI chatbot with advanced RAG (FAISS), multi-tool integration (Tavily Search, financial tools, weather, translation support for 100+ languages), and streaming responses.
- Implemented JWT authentication, SMTP-based password recovery with HTML email templates, and full conversation history persistence via PostgreSQL (Neon.tech).
- Designed an automatic LLM fallback mechanism (Groq → NVIDIA) for high availability, and deployed a React frontend with light/dark mode and real-time tool execution indicators.

Smart DB Agent | Link

Python, LangGraph, LangChain, Streamlit, MySQL

- Developed a Smart DB Agent that connects with hosted databases and enables users to execute natural language queries while returning structured results and the generated SQL queries.
- Built using LangGraph, LangChain, and Streamlit, the system simplifies database interaction through intelligent automation. Used the Superstore dataset as the backend database for testing and demonstration.

AI Recruitment Automation System | Link

n8n, Gemini, Groq, Airtable, Zoom API, Google APIs

- Built an AI-powered recruitment automation system that screens resumes, evaluates candidates against job descriptions, and automates shortlisting decisions.
- Developed LLM-driven candidate assessment and personalized interview question generation to streamline the hiring process.
- Automated interview scheduling, Zoom meeting creation, candidate tracking, and email communication through Airtable and Google Workspace integrations.
